

# Students Can Start Their Career in High School

## High School Apprentices:

- May acquire up to 8—Grade 12 High School credits.
- Earn minimum wage plus 10%.
- Collect work experience hours that count towards trade certification.

## How to Get Started:

- Find employment in a trade (contact family and friends as well as introduce themselves to employers in person with a resume and cover letter).
- Be at least 16 years old .
- Contact a HSAP Teacher and fill out the necessary forms.

## After High School:

- Apprentices continue to learn on the job and collect work experience hours.
- Apprentices typically work for 10 months each year, and then attend technical training through Apprenticeship Manitoba at either Red River College or Assiniboine Community College to complete a level of training.
- Apprentices complete 2-5 levels of training depending on the trade they choose.

Students see the value of their learning at the work place.

Students under the age of 18 need consent from their parents/guardians to participate in the HSAP.

## Find Out More:

If you are interested in learning about a career in the trades, or want to consider the High School Apprenticeship Program, talk to your Career Education teachers.

- Machinist

# HSAP Guide

High School Apprenticeship Program

## What is HSAP?

The High School Apprenticeship Program (HSAP) is a work experience credit. Students are trained on-the-job by a qualified trades person. Students earn school credits, get paid and gain apprenticeship hours.

Check out the full list of possible trades at:
